Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Information Disclosure Statement

The information disclosure statement filed February 05, 2009 fails to fully comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the information disclosure statement fails to set forth date of publication as well as author or publisher for the reference listed under NON-PATENT LITERATURE DOCUMENTS. Further, Applicant does not appear to have provided a full copy of the listed Laid Open Application or published application. It has been placed in the application file, but the information referred to therein, with respect to the reference listed under NON-PATENT LITERATURE DOCUMENTS and the reference listed under FOREIGN PATENT DOCUMENTS, has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 6, and 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains

Art Unit: 3637

subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not appear to have originally disclosed an “apparatus...consisting of: a wall panel, wherein the wall panel consists of one substantially flat wall and two wall panel ends and a male engagement portion at each end, wherein each male engagement portion consists of a fin, wherein both fins extend from one side of the wall panel”. The specification does not appear clear and complete as to such an apparatus.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 6, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, it is not clear as to what is being defined by “apparatus...consisting of: a wall panel, wherein the wall panel consists of one substantially flat wall and two wall panel ends and a male engagement portion at each end, wherein each male engagement portion consists of a fin, wherein both fins extend from one side of the wall panel”. The specification does not appear clear and complete as to such an apparatus particularly, with respect to the elected species of the invention to “having one straight surface w/male portions having first projections parallel to each other and to the wall and second projections perpendicular to each other”.

It is not clear as to what is being defined by claim 6 with claim 6 apparently introducing a further element or feature to the invention defined by claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Elderson 6,021,618. Elderson discloses, Fig. 1, a wall panel 14, wherein the wall panel consists of one substantially flat wall 18 and two wall panel ends and a male engagement portion, (sections extending outwardly from wall 18 along one side thereof), at each end, wherein each male engagement portion consists of a fin, (the respective section extending outwardly from wall 18), wherein both fins extend from one side of the wall panel. The wall panel has perforations 22.

Response to Arguments

Applicant's arguments with respect to claims 1, 6, and 8 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Safavi whose telephone number is (571) 272-7046. The examiner can normally be reached on Mon.-Fri., 8:30-5:00.
